

AskMyDocs RAG System · Technical Specification

1. Overview

AskMyDocs is a high-performance Retrieval-Augmented Generation system. It ingests private PDF documents, breaks them into vector embeddings, and retrieves contextually accurate answers using Groq Llama 3.1.

2. Architecture & Pipeline

Flow A: PDF Upload -> PyMuPDF Text Extraction -> Chunking -> Chroma DB.

Flow B: User Question -> Sentence Transformer -> Vector Search -> Llama 3.1.
